

MEDIA RELEASE

13 July 2017

More than 200 people attended a “call to arms” public meeting in Gloucester this evening and expressed overwhelming opposition to GRL’s proposed Rocky Hill coal mine.

The Department of Planning is currently reviewing GRL’s Response to submissions and will soon be making a recommendation about whether or not the mine should be approved.

The following resolution was unanimously passed (with one abstention):

“This meeting of residents of Gloucester and environs expresses its total opposition to the proposed Rocky Hill coal mine on account of its proximity to closely settled areas and the known harmful impacts that will result.

This meeting calls on the Berejiklian Government to take immediate action to prevent the proposed Rocky Hill coal mine being approved and to rescind all exploration licences currently held by Gloucester Resources Limited.”
